

I have been listening to Air 1 radio at KlrD 90.1FM in Yucaipa, Ca since I was a child, It was a positive influence on me and my friends as we grew up in the community. It still is effecting the lives of thousands in just that little community alone. Many Fm stations carry the air1 programing and have the same concerns for their local service. If it where to be replaced by LPFM it would change the communities that listen to this station. The public outcry would be widespread across the country. Please take this into consideration when making your decision.
